Women's health and life experiences

Version 12.0

(Rev. 25 Feb 2015)

Acknowledgements with WHO questionnaire Version 10:

This questionnaire was developed by Dr Henrica A.F.M. Jansen (WHO, Geneva) and Dr Charlotte Watts (London School of Hygiene and Tropical Medicine, UK) with input from other members of the Core Research Team: Dr Mary Ellsberg and Lori Heise (Program for Appropriate Technology in Health, Washington DC), and Dr Claudia García-Moreno (WHO Geneva) for the WHO multi-country study on women's health and domestic violence.

Early drafts of the questionnaire were reviewed by the following members of the study expert steering committee: Jacquelyn Campbell, Johns Hopkins University; Lucienne Gillioz, Bureau d'Egalite, Geneva; Rachel Jewkes, Medical Research Council; South Africa; Ivy Josiah, Women's Aid Organisation, Malaysia. Further there were inputs from experts in the different areas covered in the questionnaire.

The questionnaire was pre-tested by the country research teams involved in the WHO Study:

Between 1999-2002, Version 9 has been used during the implementation of the WHO Multi-country study in the countries mentioned above. Version 10 incorporates a number of improvements based on extensive experience with and feedback on Version 9. It also contains a few new questions which enable measurement of associations between partner violence and HIV/AIDS risk.

Version 10 was the last version used in the actual WHO multi-country study.

Version 11.0-11.5 were updated by Henriette Jansen for the studies that replicated the WHO methodology:

- Version 11.0(2009 – 2010) included modifications (in red font) based on the lessons learned from the use of version 10 in the WHO multi-country study.
- Versions 11.1, 11.2, 11.3 and 11.4(in green, blue, purple and orange font for respectively) reflect updates made during 2012 and 2013. They include minor changes in section 7 and major changes in section 10 (more details on non-partner violence, including data for past 12 months and sex of the perpetrator), in particular to enable computation of the UN statistical indicators on violence against women (UNSD 2013). This version incorporates (further improved) questions from the UNECE questionnaire module developed for these indicators, without compromising the comparability with earlier versions. These versions have been used in a number of studies in the Pacific and South-Asian Region.
- Version 11.5 (June 2014, changes in dark purple) includes some new minor edits, plus a number of additional questions on sexual violence by non-partners, as proposed by WHO, to capture more aspects of sexual violence. This version has not been used in the field but preceded the expert meeting in Geneva.

The generic Version 12.0 (October 2014, changes in red with yellow highlight) includes major changes, incorporating suggestions of the expert meeting that took place at WHO in Geneva 24 June 2014 (mention participants and summarize changes).

Cambodia adaptation of the questionnaire:

This Version 12.0 has been adapted for Cambodia and incorporates a number of improvements based on experiences and pre-testing between January and March 2015 by the Cambodia research team involved in the WHO Study: the Technical Working Group of the Cambodia Study, Debbie Gray (WHO Cambodia), Christina Pallitto (WHO HQ), Britta Baer (WHO Western Pacific Regional Office), Henrica A.F.M. Jansen (UNFPA APRO).

The study in Cambodia was the first to develop and test an EDC (Electronic Data Capture) system for the WHO questionnaire.
